THE QUICK-WIN PLAYBOOK

15 MINUTES / MOBILE DOG GROOMERS

1 Record service variables

Note breed/size, coat length, grooming task, special handling requests and a realistic time allowance.

Action: Define any extra-matting charge before the appointment.

2 Capture full time

Add grooming, vehicle setup, travel, cleaning and customer handover. Keep visit and route time visible.

Action: Use total appointment time in your costing.

3 Estimate cost per booking

Multiply total hours by loaded internal hourly cost. Add products, fuel, equipment use and overhead.

Action: Review cost assumptions every month.

4 Protect the schedule

Calculate your minimum price and set clear cancellation, late-arrival and scope-change terms appropriate to your business.

Action: Leave buffer time for unexpected coat conditions.

CHECK BEFORE YOU COMMIT

Confirm your inputs, write down your assumptions and review the result yourself. AI can draft text; it cannot verify missing facts.

TAKE-HOME WORKSHEET

Fill these six fields, then use the prompt to draft the customer-facing output.

Pet size / coat

Requested services

Groom + travel + setup time

Products + operating costs

Loaded total cost

Price and rebooking date

COPY-AND-PASTE AI PROMPT

Organise my mobile dog-grooming service notes into a customer quote and visit checklist. Use only the services, price, pet details and times I provide. Separate standard care from extra work and request any missing handling information. Do not claim the pet is medically suitable for grooming.

WORKED MINI-EXAMPLE

Time: 135 min @ €20/h	€45
Consumables	€7
Operating allocation	€8
Price at 40% margin	**€60 ÷ 0.60 = €100**

WATCH OUT Travel and clean-down often turn a 75-minute groom into a two-hour-plus appointment.
