THE QUICK-WIN PLAYBOOK

20 MINUTES / FREELANCE WEB DEVELOPERS

1 Define the plan boundary

List exactly what is included: updates, monitoring, backups, small edits, reports, response window and exclusions.

Action: State a maximum included support allowance.

2 Estimate recurring costs

Add hosting, licensed tools, estimated support hours, reporting/admin time and allocated overhead.

Action: Review actual support time per client monthly.

3 Price for the required margin

Use monthly cost ÷ (1 − gross margin target) and check whether the result fits the intended buyer.

Action: Design service tiers rather than hiding unlimited work.

4 Set the change boundary

Define how clients request out-of-scope features, revisions, emergencies and migrations.

Action: Provide a separate quote for substantial project work.

CHECK BEFORE YOU COMMIT

Confirm your inputs, write down your assumptions and review the result yourself. AI can draft text; it cannot verify missing facts.

TAKE-HOME WORKSHEET

Fill these six fields, then use the prompt to draft the customer-facing output.

Plan name / audience

Included monthly tasks

Included support hours

Tools + hosting costs

Loaded monthly cost

Subscription price / exclusions

COPY-AND-PASTE AI PROMPT

Write a clear website maintenance plan from the features, response times, limits and monthly price that I provide. Separate included routine care from billable project work and describe how extra requests are quoted. Ask about backups, security responsibilities and termination terms. Do not invent service-level guarantees.

WORKED MINI-EXAMPLE

Hosting + licensed tools	€30
1.5 h support × €30	€45
Admin + overhead	€25
Price at 50% margin	**€100 ÷ 0.50 = €200/month**

WATCH OUT “Unlimited edits” creates an uncapped labour obligation on a fixed monthly fee.
