THE QUICK-WIN PLAYBOOK

20 MINUTES / CLEANING COMPANIES

1 Define the service boundary

Record rooms, floor area, surfaces, special requests, frequency, access rules and who supplies products.

Action: Write down 3 tasks that are included and 3 that are excluded.

2 Estimate the workload

For recurring jobs, multiply visits per month by expected hours per visit. Include setup, travel and any periodic deep-clean work.

Action: 8 visits × 2.5 hours = 20 cleaning hours / month.

3 Build the cost floor

Total loaded labour cost, travel, consumables, equipment and allocated overhead. Do not confuse your cost per hour with your selling price.

Action: Add every cost before setting a margin.

4 Price and verify the quote

For target gross margin, use price = total cost ÷ (1 − margin). Add applicable taxes separately and review the scope.

Action: Get written approval for frequency, inclusions and price.

CHECK BEFORE YOU COMMIT

Confirm your inputs, write down your assumptions and review the result yourself. AI can draft text; it cannot verify missing facts.

TAKE-HOME WORKSHEET

Fill these six fields, then use the prompt to draft the customer-facing output.

Customer & location

Visits per month

Hours per visit

Total monthly job cost

Target gross margin %

Price excluding applicable tax

COPY-AND-PASTE AI PROMPT

Act as a quotation-writing assistant for a cleaning company. Using ONLY the scope and price I provide, draft a one-page quotation covering tasks included, tasks excluded, frequency, access assumptions, start date, payment terms and validity. Flag missing information. Do not invent prices, taxes, dates or guarantees.

WORKED MINI-EXAMPLE

Visits × hours	8 × 2.5 h = 20 h
Fully loaded costs	€600 per month
Target gross margin	35%
Indicative price	**€600 ÷ 0.65 = €923.08**

WATCH OUT Do not quote before checking keys, parking, supplies, special surfaces and periodic tasks.
