THE QUICK-WIN PLAYBOOK

15 MINUTES / MOBILE AUTO DETAILERS

1 Define the package

Write the included wash, interior and finishing tasks. State vehicle-size assumptions and what counts as heavy soiling.

Action: Separate the standard service from add-ons.

2 Estimate total job time

Include onsite work, setup, teardown, travel and customer handover. More driving means fewer bookable hours.

Action: Record travel time separately from treatment time.

3 Add all operating costs

Include loaded time cost, chemicals, cloth depreciation, fuel, equipment allocation and allocated overhead.

Action: Use realistic per-job amounts, not just the cost of shampoo.

4 Calculate your selling floor

Price before applicable taxes = total job cost ÷ (1 − gross margin target). Compare with local demand and adjust the offer.

Action: Reject or redesign jobs that cannot support the required margin.

CHECK BEFORE YOU COMMIT

Confirm your inputs, write down your assumptions and review the result yourself. AI can draft text; it cannot verify missing facts.

TAKE-HOME WORKSHEET

Fill these six fields, then use the prompt to draft the customer-facing output.

Vehicle & condition

Service package

Onsite + travel hours

Materials + travel costs

Total loaded job cost

Minimum selling price

COPY-AND-PASTE AI PROMPT

You are my mobile detailing estimate assistant. Create an accurate service scope and customer-ready quote from the details supplied below. Keep the base package separate from optional extras such as pet-hair removal and paint correction. List assumptions and uncertainties. Never invent vehicle condition, required hours or prices.

WORKED MINI-EXAMPLE

Loaded labour + time	€54
Products, travel, equipment	€46
Total job cost	€100
Price at 45% margin	**€100 ÷ 0.55 = €181.82**

WATCH OUT A two-hour cleaning appointment can consume three hours after setup and travel.
