THE QUICK-WIN PLAYBOOK

20 MINUTES / INSTALLERS & TRADES

1 Clarify the scope

Record equipment, quantities, site access, removal work, permits to verify and customer-supplied items.

Action: Identify at least two site uncertainties.

2 Estimate materials and time

Build the parts list and expected labour hours. Include travel, disposal, testing and specialist subcontractors.

Action: Separate supplier price from your fully loaded costs.

3 Price with a margin

Add loaded labour, materials and overhead; then calculate a selling price with your chosen target margin.

Action: Recheck costs before the quote is accepted.

4 Control variations

If conditions change, document the new work, price, schedule effect and customer approval BEFORE proceeding where practicable.

Action: Use a numbered change-order record.

CHECK BEFORE YOU COMMIT

Confirm your inputs, write down your assumptions and review the result yourself. AI can draft text; it cannot verify missing facts.

TAKE-HOME WORKSHEET

Fill these six fields, then use the prompt to draft the customer-facing output.

Site & requested outcome

Included work / exclusions

Labour hours & cost

Materials + subcontractors

Target margin / quote

Change approval method

COPY-AND-PASTE AI PROMPT

Draft a concise installation quotation from the scope, quantities, customer-provided details and price that I supply. Include assumptions, exclusions, material allowances and a change-order process. List questions for site verification. Do not invent technical compliance, certifications, permits, inspection results or prices.

WORKED MINI-EXAMPLE

Loaded labour	€157.50
Parts + travel + overhead	€285.00
Job cost total	€442.50
Price at 30% margin	**€442.50 ÷ 0.70 = €632.14**

WATCH OUT An extra fixture or changed route should not silently become unpaid work.
